AutoCAD Architecture AutoCAD's architecture is quite complicated and based on the idea of 'symbolic links' -- "all objects and data in the application are stored in files and folders that may be organized into a directory tree." As shown in this architecture diagram, the files that comprise AutoCAD are stored in a subdirectory of the main Autodesk folder. The folder is subdivided into three more subfolders. The .dwg folder contains the ASCII files that comprise AutoCAD and its AutoCAD Arch (e.g. .dwg file) folder contains the ASCII files that comprise AutoCAD and its AutoCAD Arch (e.g. .dwg file) The .img folder contains the image files that comprise the AutoCAD software user interface (UI) (e.g. .img file). folder contains the image files that comprise the AutoCAD software user interface (UI) (e.g. .img file).
